

StreamOne® Ion

PSA Connectors for Autotask and ConnectWise

Transform your business processes, enhancing efficiency with full StreamOne® data integration.

As a Managed Service Provider (MSP), you're always looking for ways to simplify procurement, increase efficiency and create more revenue opportunities. Professional Services Automation (PSA) solutions provide a straightforward path toward realizing these outcomes. Now, with StreamOne® Ion, connecting to your PSA of choice is easier than ever.

StreamOne® Ion PSA Connectors allow you to fully integrate your platform data with your PSA, with advanced synchronization settings for flexible and configurable control over your cloud management.

Plus, StreamOne® Ion provides near real-time sync to PSA, so you have accurate visibility into vendor pricing and any changes to your customer's subscriptions. With this feature, you can feel confident your data is always accurate and up to date, allowing you to expedite your billing processes for faster time to revenue.

“[Billing data] is live, so as something changes in Azure, the billing changes are reflected through to ConnectWise. So you can pretty much **bill whenever you want** and you'll be **accurate**. We don't have to try and catch up on the next month with stuff we might have missed because we're out of sync with the billing cycle.”

André Dowding, Managing Partner, Net Intellect

StreamOne® Ion PSA Connector Capabilities:

- Intuitive, guided installation and set-up
- Filters and notifications for error-handling
- Global synchronization settings and templates
- Configurable proration rules
- On-demand and scheduled daily sync
- Product sync including cost and price
- Real-time sync for subscription seat count changes
- Automated billing reconciliation sync (IaaS)

Leverage the capabilities of both StreamOne® and your PSA for optimal efficiency.

Improve billing accuracy and align to your unique billing cycles.

Streamline procurement by operating more of your business in one user interface.

Enable upfront billing for license and usage-based products.

About StreamOne® Ion

StreamOne® Ion provides a unified and automated delivery model to simplify the complexity of the IT ecosystem for MSPs. It is architected to enable MSP digital transformation and revenue growth at scale. Along with industry-leading PSA Connectors, StreamOne® Ion offers consolidated billing, white label storefronts for end user self-service, cost optimization tools and capabilities to help you grow your Cloud business efficiently.

Grow your business at scale, with best of breed tools and capabilities to optimize your end-to-end digital journey.

- Automated Multi-Cloud Billing
- Unified Customer Management
- White Label Storefronts
- Real-time data visibility
- PSA Connectors
- FinOps IaaS Optimization Tools
- Custom Pricebooks
- Automated Cloud-based Solutions
- Full Range of API Integrations
- Custom Reporting and Dashboards

I think [StreamOne®] ticks every box I can think of as far as being **easy to use**. I always used to need to be quite heavily involved in ordering, and it's been easy to train a few of our support staff. I don't really have to touch it at all now, so it's provided a lot of **efficiency that we haven't had before**.
